Rates of Crime Victimization in Kenya

This would mean that the social status in the society contributes to crime victimization in Kenya.

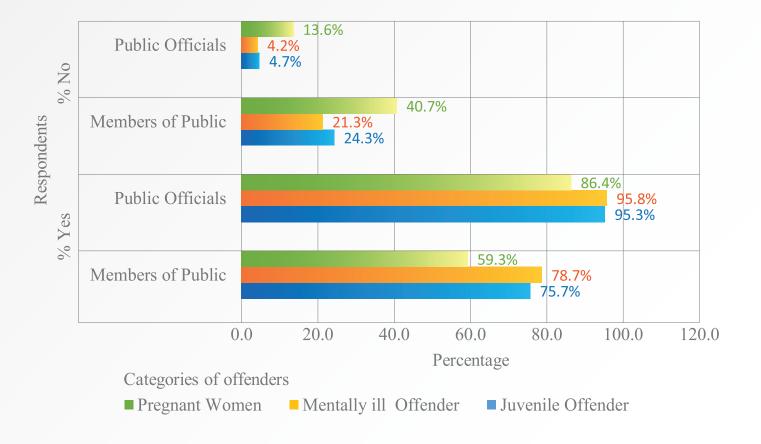

Types of crimes experienced were; theft/stealing given that 31.5% of the respondents or their family were victims of theft/stealing, 17.4% of the respondents were victims of burglary/stealing, 14.4% of the respondents or their family had been victims of robbery or mugging, 6.7% of the respondents had members of their family as victims of murder. Also, 6.1% of the respondents or

their family had been victims of robbery with violence, 3.4% of the respondents or their family members were victims of rape with 0.6% of the respondents saying that they or their family had been victims of defilement. This could be an indication that very few cases of defilement are reported.

Awareness Levels of Capital Offences Punishable by Death in Kenyan Law

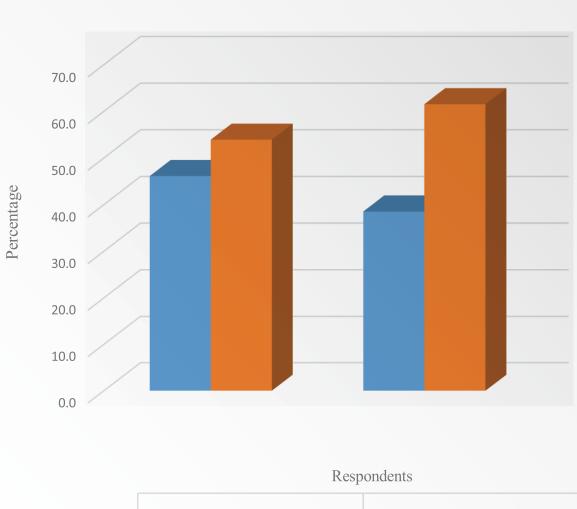

County Analysis on Members of Public Awareness of Categories of Offenders to Whom Death Penalty Cannot be Applied

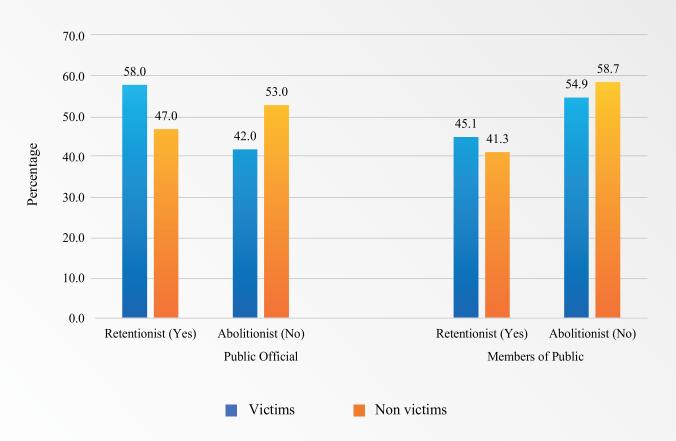

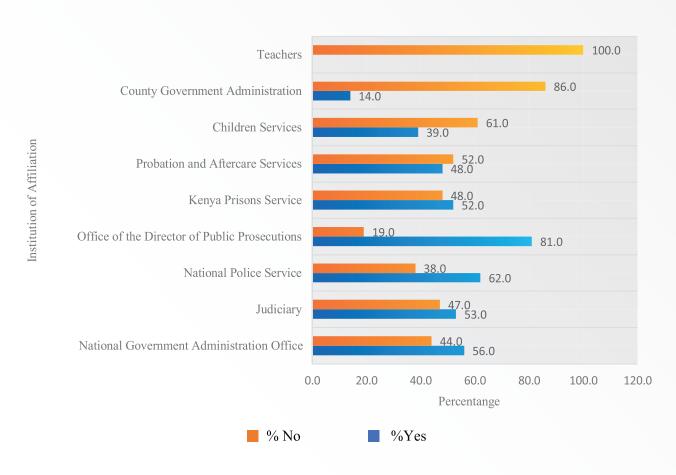

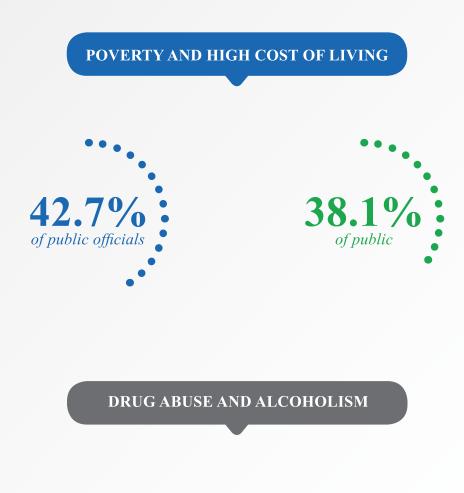

Figure 18: Institutional Affiliation and Public Officials on Whether Capital Offences
Should Attract Death Sentence

Factors Contributing to Offenders Committing Capital Offences in Kenya

Factors contributing to offenders committing capital offences were found to be: poverty and high cost of living (reported by 42.7% of public officials and 38.1% of public); drug abuse and alcoholism (reported by 28.6% of public officials and 27.5% of members of public);

Unemployment, greed and lust, mental illness and depression, political influence and incitement, religion, cults and radicalization, tribal animosity and tribalism were also mentioned as root causes of capital offences in Kenya.

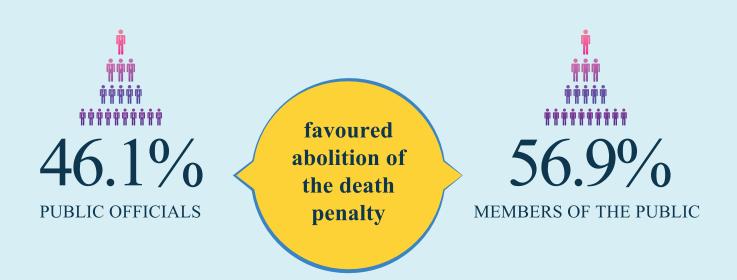

Public Perception on Retention or Abolition of Capital Offences & Punishment in Kenya

perceptions on retention or abolition of public were in favour of abolishing death capital offences

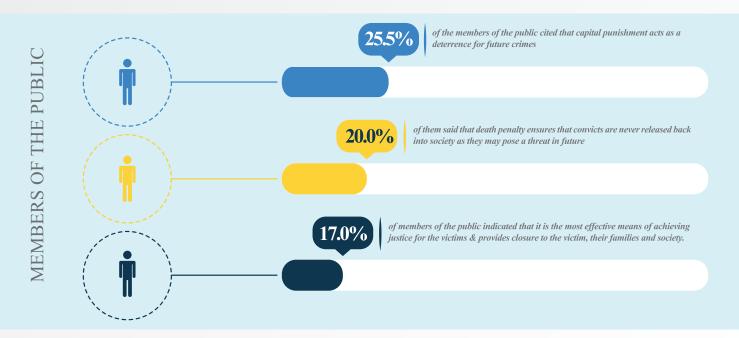

The findings established that 53.9% of public officials and 43.1% of members of the public were in support of retaining the death sentence.

This study sought to establish public On the other hand, 56.9% of members of the penalty while 46.1% of public officials favoured abolition of the death penalty.

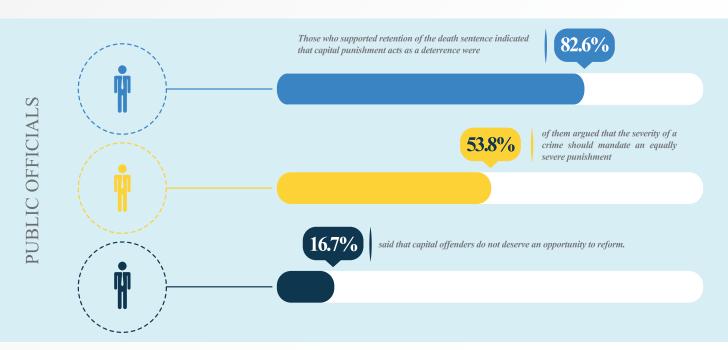

On this, 25.5% of the members of the public cited that capital punishment acts as a deterrence for future crimes, 20.0% of them said that death penalty ensures that convicts are never released back into society as they may pose a threat in future, 17.0% of members of the public indicated that it is the most effective means of achieving justice for the victims and provides closure to the victim, their families and society.

Public officials 82.6% who supported retention of the death sentence indicated that capital punishment acts as a deterrence, 53.8% of them argued that the severity of a crime should mandate an equally severe punishment and 16.7% said that capital offenders do not deserve an opportunity to reform.

Other reasons included the assertion that death penalty reduces the chances of convicts ecaping from prison.

The study also sought to know from the respondents who were in support for retention of death sentence if there are other crimes that should be punished by death.

It was found out that, 59.0% of the respondents believed that there were other offences that should be punishable by death. On the other hand, 41.0% of the respondents opposed the idea of having other offences to be included in the death penalty sentencing.

From the study findings, majority (54.6%) of the members of the public said that rape, defilement (41.0%), terrorism (8.9%) and economic crimes and corruption (8.6%) should be punishable by death.

However, 58.1% of public officials believed that defilement is the most serious offence that should be punished by death, followed by rape (31.4%) terrorism (12.8%) and economic crimes (8.1%). Other offences, mentioned minimally (3.0%) by the respondents to attract the death penalty included abortion, unnatural sex acts, drug trafficking, cattle rustling, kidnapping, incitement, possession of illegal firearms, child abuse and human trafficking.

In regard to the opinions of respondents on appropriate alternative sentences for offences currently punishable by death, 68.4% of members of the public and 70.0% of public officials were of the view that life imprisonment would be a suitable alternative.

Also, 14.0% of public officials and 9.0% of members of the public favored long term imprisonment (20-50 years) as would be appropriate. Other alternatives indicated (at very low rates) as suitable included

rehabilitation and when ready be reintegrated back to the community; short term prison sentence (10-15 years)

which includes imprisonment with hard labour that is beneficial to the state would be the best alternative sentence; corporal punishment use of traditional community based sentences and use of fines.

On the period of life imprisonment, the respondents' opinions were sought on whether life sentence should be with or without limit. From the findings of the study, 51.1% of members of the public were in favour of life imprisonment without limit while 48.1% recommended alternative duration for life sentences. On the same, 43.9% of public officials supported life sentence without limits, but 56.1% were in support of life sentence with limit.

For life sentence with limit, majority of members of public (33.2%) were in favour of recommended duration of 21-30 years, while their public official counterparts (26.5%) favoured life with option of condition of parole after 10-25 years. Also, 24.6% of members of the public and 9.7% of public officials favoured a sentence of less than 21 years.

Other recommended durations for life imprisonment were a sentence of between 31-40 years supported by 11.8% of members of the public and 9.0% of public officials; 7.2% of members of the public and 8.3% of public officials were for a sentence of 41-50 years; a sentence of 51-70 years was supported by 6.3% of members of the public and 9.0% public officials; 5.4% of members of public and 2.1% public officials indicated a sentence of 71-100 years among others.

Recommended Victims Support Service in Kenya

From the findings, 41.0% of members of the public and 75.6% of public officials recommended economic empowerment such as financial compensation and employment for victims. Members of the public (17.5%) and public officials (55.6%) as well indicated need for guidance and counseling for victims.

Other views were that victims should be offered free medical attention (8.8% reported by members of the public and 18.8% reported by public officials); victims should be provided with security and witness protection (7.8% of members of the public and 21.8% of public officials); victims should be given justice and a fair hearing (8.0% of members of the public and 11.5% of public officials); provision of legal assistance (18.8% of public officials and 5.0% of members of the public); provision for free education; facilitation of reconciliation between victims, offenders and their families; relocation of offenders to reduce cases of trauma and revenge against the victim; more awareness and sensitization on the plight of victims; religious and community support for victims and establishment of rescue centres and homes for victims were more recommendations given though at lower percentage rating *as provided in Table 3.21*.
